AVAYA
OneCloud™

Avaya is defined by the experiences it creates. It connects people, and things, in ways that offer more immersive, more productive and more memorable experiences….experiences that matter.

Avaya OneCloud is a multi-cloud application ecosystem that provides for the future of the Customer Experience Centre (evolved contact centre) and the future of the Digital Workplace (advanced unified communications).
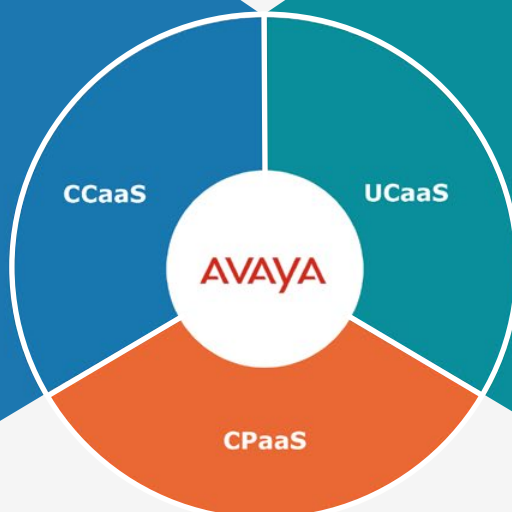

Avaya sales teams and partners, and all Avaya associates, should learn to tell the Avaya Story through the following actions:

- Listen to the recorded presentation and hear how the experts present our story
- Download the scripted presentation to deliver to your customers
- Practice your pitch!
